

Barrier Footwear Systems

Barrier Footwear Systems

Assured Chicken Production (ACP) standards stipulate barrier footwear systems must be provided along with foot dips / mats and DEFRA approved disinfectants at personnel access points to poultry houses, equipment and litter stores and other bird areas.

Footwear must be dipped by all personnel and visitors before entrance and after exit to a building. This practice helps to reduce the spread of diseases and therefore reduce the need to administer expensive medicines which result in increased veterinary bills.

Our Barrier Footwear Systems are made to measure to suit the application and location. Available in either two or three sided variations in a choice of two colours.

Dimensions

Height: 31cm, Length: 150cm, Depth: 1cm

Models

- 2 sided
- 3 sided
- Black
- Natural

Key Features
