

## Medicators & Dosers

# Mobile Cart

## Chemical Injection Delivery System

Mobile Cart is of superior rugged technology just like the SuperDos and MiniDos so you get maximum mobility and durability. It can be operated anywhere without electricity to precisely inject liquid concentrates into a water supply line using fluid flow as the power source.

SuperDos or MiniDos which are sold separately are designed with a patented internal mixing chamber that promotes homogeneous mixing, while segregating harsh chemicals from critical internal components.

### Key Features

- Just the right amount of chemical is injected each and every time regardless of pressure and flow
- Made of medical grade steel and will not rust
- Solid wheels - No flat tyres
- Maneuvers easily down narrow aisles
- Twist II Clean filter included with each cart

With our Mobile Cart, you can:

### **Reduce Cost**

Proportional positive displacement ensures that just the right amount of chemical is injected each and every time, regardless of pressure and flow. Chemical costs are reduced because of less waste in the injection process.

### **Defy the elements**

Our mobile systems feature medical-grade stainless steel carts, so they're impervious to water and rust. You can leave our carts in place, despite the weather.

### **Keep moving**

Our mobile unit's solid wheels ensure that you always stay up and running, without the worry of flats.

### **Navigation easily through aisles**

Our Mobile Systems have narrow frames with a 17" wheel base, for easy access to tight aisles.

### **Stay steady**

Hoses connect at axle level on the Mobile Systems, to make them exceptionally stable - while helping to prevent a costly tip-over.

### **Make applications easier**

Our Injectors include A built-in On/Off bypass allowing you to stop the injection - but not the system.

### **Save time, money, and repairs**

TwistItClean® Filters are included with each system, with our 5 second patented filter cleaning. There's no mess, no disassembly.
