

Partitioning Boards

Partitioning Boards

An effective, hygienic solution to segregate sexed birds within poultry housing.

With the greater need to reduce *Campylobacter* and other diseases this barrier is a light weight, hygienic alternative to traditional wood and steel systems. Made from aluminum, the barriers are non-corrosive, suitable for arduous environments and easy to clean.

Made to order, the partitioning boards feature brush strips to accommodate drinking and pan feeding systems of all shapes and sizes and now the new self adjusting chain feeder adapter system which, if ever was replaced with pan feeders, can be converted at very little cost and disruption.

Key Features

- Lightweight and durable
- Non corrosive, non porous materials
- Smooth cleaning surfaces so dirt does not stick, making cleaning easier
- Replaceable parts
- Brush Strips to seal around drinkers and feeders
- Sealed tube ends to eliminate faecal matter build up
- Bespoke made to fit your requirements
- Replacement brush strips available
- Can be used with Pan or Chain feeding
